

# Precision Nitrogen Trace 250 N2 gas generators

Application: GC & GC-MS Carrier & Detector Gas

Part number: 62-0250 (230V) | 62-0251 (110V)

## Description

The Precision Nitrogen Trace 250 has been developed to provide a constant and consistent source of nitrogen for carrier, make-up and reference gas at trace detection levels for GC applications as well as for sample preparation. These generators are capable of delivering ultra high purity nitrogen, removing oxygen and moisture via Pressure Swing Absorption using Carbon Molecular Sieve technology, as well as removing hydrocarbons by means of catalytic oxidation to ensure maximum purity output.

As with all Precision Series generators, the Nitrogen Trace 250 model benefits from a compact and modular, stackable design, minimizing the total footprint required for GC gas supply, and providing flexibility to add or remove modules as your laboratory requirements evolve over time.

- **Gas types** Nitrogen
- **Integrated compressor:** No
- **Application Types:**  
GC & GC-MS Carrier & Detector Gas

## Key Features

- Suitable as make-up gas at standard detection limits
- Nitrogen generated on demand, as and when it is required
- Constant and consistent supply, avoid running out of gas during analysis
- Avoid contaminants entering system as result of changing over empty cylinders
- Catalyst chamber to remove hydrocarbons (as methane) to <0.05 ppm
- Dedicated Precision compressor module available where house supply not available
- Integrates seamlessly with other Precision units
- Ultra-fast start-up time, quick to reach standard operating purity
- Minimum maintenance with an annual filter change
- Compact, space-saving modular design
- 12 month comprehensive on-site warranty

# Technical Specifications

|                        | Precision Nitrogen Trace 250 N2 gas generators          |
|------------------------|---------------------------------------------------------|
| Gas Type               | Nitrogen                                                |
| Max Gas Flow:          | 250cc/min                                               |
| Max Output Pressure:   | 80psi/5.5bar                                            |
| Hydrocarbon Content:   | <0.05ppm                                                |
| Max Output Pressure:   | 80psi/5.5bar                                            |
| Max Purity:            | 99.9995%                                                |
| Min Inlet Pressure:    | 120psi/8.3bar                                           |
| Max Inlet Pressure:    | 145psi/10bar                                            |
| Min Inlet Air Quality: | ISO 8753-1:2010 Class 1.4.1 or Precision Air Compressor |
| Start Up Time:         | 90 mins                                                 |
| Voltage:               | 110 / 230 ± 10% V                                       |
| Frequency:             | 50 / 60 Hz                                              |
| Current:               | 4.4 A / 2.1A                                            |
| Heat output:           | 1650 BTU/Hr                                             |
| Max Operating Temp:    | 35°C / 95°F                                             |
| Accreditations:        | CSA, CE                                                 |
| Size (HxWxD) mm        | 256 x 380 x 540 mm                                      |
| Size (HxWxD) Inches    | 10.1 x 15 x 21.3 inches                                 |
| Generator Weight       | 38kg / 83.6lbs                                          |
