

Precision Nitrogen Trace 1000 - GC gas generator

Application: GC & GC-MS Carrier & Detector Gas

Part number: 62-1000 (230V) | 62-1001 (110V)

Description

The Precision Nitrogen Trace 1000 has been developed to provide a constant and consistent source of nitrogen for carrier, make-up and reference gas at trace detection levels for GC applications as well as for sample preparation. These generators are capable of delivering ultra high purity nitrogen, removing oxygen and moisture via Pressure Swing Absorption using Carbon Molecular Sieve technology, as well as removing hydrocarbons by means of catalytic oxidation to ensure maximum purity output.

As with all Precision Series generators, the Nitrogen Trace 1000 model benefits from a compact and modular, stackable design, minimizing the total footprint required for GC gas supply, and providing flexibility to add or remove modules as your laboratory requirements evolve over time.

- **Gas types** Nitrogen
